eZeeSalez – Our own product

The Challenge

Supplier, Manufacturer, Distributor, Wholesaler, and Retailer are core part of the “Supply Chain” and when it comes to sharing Product information within them, they are still dependent upon the slow and inefficient ways like e-mail, catalogues, SMS, messenger, telephone, etc. There has always been an increasing demand to expedite this communication process.

The Solution

‘eZeeSalez’ comes as our answer to this.

eZeeSalez is a whole new approach to the traditional way of Buying and Selling. Whether you are a Manufacturer, Distributor, Dealer, Wholesaler or Retailer & whether you want to Buy or Sell to your existing clients, eZeeSalez provides you the best platform. Now you can Sell products to the best of your customer base as well as Buy products from your trusted sellers and find the best of both of these worlds in your contact list itself. With the buyer/seller list coming directly from your contact list, eZeeSalez narrows down the gap between your business and customers

As a seller, you can now reach out your customers on any and every Android device. You can share Product information, its Price, and changes in Pricelist with your existing customers in just a single tap. You can showcase different essence of product, using high quality images speaking out for your products. You can maintain custom price lists, for your new and exclusive customers.

Buying a product on eZeeSalez is equally easy, with all the product information right at your finger tip on a single tap.

eZeeSalez dashboard allows you to access multiple statistics on a single tap. Basically the approach is MORE WORKING, LESS TAPPING.

Good things come at a Cost but eZeeSalez doesn't. It's Absolutely FREE.

Android app for a restaurant

Client based in – USA

The Challenge

The client wanted to improve the restaurant's home delivery services and wanted to utilize the fact that people would love to place order with just a tap.

The Solution

We developed a mobile app for the client.

The app listed the latest menu from which customers could pick items and place their orders. Online payment option was integrated to make it easy for customers to complete their orders without any hassle.

Customers could also track their orders.

The app brought a lot of orders to the client and he was happy seeing his business flourish.

App for a private tutor

Client based in – USA

The Challenge

A private tutor demanded a mobile app to be developed for his classes.

The Solution

We developed an app that made it easier for the tutor to communicate with the students as well as parents.

The tutor could share class schedules/ cancellation alerts to the students at one tap. He could easily share test schedules and marks to the students. Additionally, the students got access to useful last minute study/exam tips.

Given the time constraints the tutor had, due to number of classes the tutor handled, the app was a real time saver for him as he could manage things with just a few taps.

Android app for plumbing service

Client based in – USA

The Challenge

A plumbing service owner found it difficult to assign tasks to the staff due to lack of availability status.

He was not happy with the series of phone he needed to do before he could decide the availability status of a plumber and assign him a new task.

The Solution

We developed an android app for the client.

The plumbers could now examine the time they would require for the current assigned task and update the place and time required for the task on android app.

All the client needed to do was just check out the app and find the availability status and priorities of the plumbers and decide for the next appointments.

Things became easier to handle for the client with this simple app.
